

Email Service Providers

If you're thinking of implementing a new Email Service Provider, this table summarises the key features for some of the most popular platforms.

Here are some things to consider when choosing your provider and plan:

- Most platforms charge based on number of contacts. Use the pricing calculators check the price for your mailing list size and ensure there isn't a high charge for going over the limit.
- Most platforms have a range of price plans with more features the more you pay. If you have specific functions you need, make sure they're available on the price plan you can afford. These platforms are listed in ascending order based on the price for 10K contacts with a basic package.
- Platforms offer a range of free trials and product demos which might help you when making your choice.
- If you want to integrate an eCommerce platform, ticketing system or CRM, make sure this integration is available for your platform.
- Platform features change regularly – use the links provided to double check all information is still correct.
- If you'd like to see another platform on this list, or think there's information missing, please [get in touch](#).
